CAREER OBJECTIVE

Software Engineer with 2 years of experience in designing and developing scalable software solutions, combining strong theoretical understanding with hands-on development expertise.

SKILL SETS

Programming Languages	Python, JavaScript, HTML, CSS
Database Exposure	MySQL, PostgreSQL, MongoDB
Operating Systems	Windows, Unix, Linux
Development Tools	Eclipse, Visual Studio, Sublime Text
Frameworks and package	React, Lang Chain, PyTorch, TensorFlow, Flask, Django, Fast API, Playwright, Pandas, NumPy
Cloud	Azure Open AI Models, AWS Bedrock, Google Gemini, AWS S3, Azure Function, Azure Storage Account, CI/CD pipeline, Docker.
Other skills	Postman, Draw.io, PlanetUMI, Git, pgadmin, WSL, Gen AI prompting, RAG, Vector DB, Hugging Face, Ollama, API Integration, Web Scraping, UiPath, Redis.

EXPERIENCE

Company: Vpearl Solutions, Chennai | **Role:** AI Application Developer

Period: January 2025 – Present

- Specialized in developing next-generation AI applications using MCP and delivering innovative solutions.
- Integrated Azure OpenAI Service, Google Gemini, and Hugging Face models to build advanced AI solutions, including fine-tuning models on Hugging Face.
- Design and implement database structures and develop RESTful APIs using Flask, Django, and Fast API, along with integrating external APIs.

Technology Stack:

- Front-End:** HTML, CSS(Tailwind), and JavaScript (React.js, Typescript)
- Back -End:** Python
- Frameworks and package:** Lang Chain, PyTorch, TensorFlow, Playwright, Selenium, Flask, Django, Fast API, Playwright, Pandas, NumPy, JWT, Crew AI
- Database:** PostgreSQL (with Vector Extension)
- Cloud:** Docker, AWS S3, Azure Open AI and AWS Bedrock, Google Gemini, Cohere
- Core Expertise:** OCR, RAG Systems, Computer Vision, Fine-tuning LLMs, API Integration (Zoho), Prompting, Chunking Strategies and Context Engineering, Multi-Threading.

Project: AI Warehouses

Period: August 2025 – Present

Designed and developed AI Warehouses (Chatbot), a PaaS web application capable of creating and retrieving data from the end-user database using MCP through a conversational interface, while leveraging advanced AI models including OpenAI GPT, AWS Bedrock and Google Gemini models.

Project: DTPC

Period: April 2025 – June 2025

Designed and developed a desktop application for web scraping and extracting specific stamp details from PDFs using OCR technologies (Tesseract and Poppler) and AI models, including OpenAI GPT. Integrated Zoho CRM APIs to automatically push the processed data into the CRM system with Auto mailing.

Project: Lang Tech

Period: January 2025 – April 2025

Designed and developed Lang Tech, a PaaS web application capable of translating Excel, Word, PDF, and text files, integrating OCR for text extraction, and leveraging AI models including OpenAI's GPT, Google Gemini, and LLaMA to ensure accurate multilingual text recognition and translation.

Company: Avasoft, Chennai | Role: Software Engineer

Period: December 2023 – December 2024

- Specialized in developing next-generation AI applications and delivering innovative solutions.
- Integrated Azure OpenAI Service and AWS Bedrock to create advanced AI solutions.
- Collaborated with the development team to design and implement database structures and develop APIs using Flask, Sanic, Django, Fast API.

Technology Stack:

- **Front-End:** HTML, CSS(Bootstrap), and JavaScript (React.js)
- **Back -End:** Python
- **Frameworks and packages:** Recharts, React Flow, Wave Suffer, Lang Chain, Flask, Playwright, Pandas, NumPy, JWT.
- **Database:** MySQL, PostgreSQL (with Vector Extension), MongoDB
- **Cloud:** Docker, Terraform, AWS S3, Azure Storage Account, Azure Function, Azure Open AI and AWS Bedrock,
- **Core Expertise:** RAG Systems, Computer Vision, Prompting, Speech to text, Chucking Strategies, Multi-Threading.

Project: LFS

Period: December 2023 – February 2024

Designed and implemented a web application (chatbot) for students to clear their doubts based on the uploaded knowledge. Implemented RAG by integrating LLMs with data search and AI responses.

Project: CloudGen

Period: February 2024 – July 2024

CloudGen is a drag-and-drop application designed to simplify cloud operations, enabling users to create services, estimate costs, and deploy them to the console with ease. The web application automates cloud processes using AI based on the requirement given by the Client, featuring a knowledge base for AI architecture generation and cloud deployment. It integrates Bot3 with Retrieval-Augmented Generation (RAG) for efficient data search and AI-driven responses. Additionally, cost estimation for each service is seamlessly implemented within the CloudGen application using Playwright.

Project: Zeb Pulse

Period: July2023 – December 2024

Designed and developed RESTful APIs to dynamically streamline all aspects of the AWS Well-Architected Framework Review, integrating AI-driven insights and automation. Implemented Terraform code retrieval using subprocess modules to enable automated evaluation, helping businesses optimize and strengthen their cloud operations.

Company: ClaySys Technologies, Coimbatore | Role: RPA Developer

Period: July 2023 – October 2023

- Created and maintained robotic automation workflows using UiPath and RPA Genie. Tested and troubleshooted automation processes to ensure smooth operation.
- Documented automation procedures, configurations, and troubleshooting steps. Collaborated with senior RPA
- developers to optimize and improve automation.

Technology Involved:

- **Tools:** UiPath, RPA Genie

EDUCATIONAL QUALIFICATIONS

Qualification	College/School	Percentage	Year of Passing
B.E(Computer Science)	Karpagam Academy of Higher Education	89%	2023
Standard XII/HSC	Jayam Matriculation Higher Secondary School	72%	2019
Standard X/SSLC	Jayam Matriculation Higher Secondary School	80%	2017
